19:45 - 21:00	Networking & Refreshments Connect with speakers, authors, and fellow attendees Book sales and signing

BRAWLERS AI MIXER

ABOUT THE BOOK

Mathematics of Disruption is a South African AI book that explains how mathematics, not computing power, is the true engine behind modern AI systems. Through the stories of three fictional South Africans, the book shows how numerical precision, optimisation, probability, and quantum theory shape real-world AI behaviour. Written for entrepreneurs, engineers, students, and policy leaders who want to understand and leverage AI.

ABOUT THE AUTHOR

Edzai Conilias Zvobwo is a mathematician, data scientist, AI strategist, and entrepreneur. He is the founder and CEO of Acalytica, a digital growth platform that helps creators, entrepreneurs, and SMEs build, brand, and bank online. His work sits at the intersection of numbers, narratives, and new economies.
